

SyAM Software™

Tool Tip: System Client Version 3.30 Silent Install

Overview:

This document provides an overview of how to deploy SyAM Software System Client version 3.30 throughout your organization using the silent install method.

Benefits:

Provides a simple way to install SyAM Software on systems while allowing the administrator to walk away during installation.

Step by Step Guide:

1. Make sure the SyAM build is in the proper directory.
2. In the command prompt, the command line should be equal to the name of the executable file (plus any of the following additional parameters to identify the installation configuration)
 - LANG** = the language for the user interface
 - DIR** = the directory where the agent will be installed
 - AGENTONLY** = the specific product to install, **no**= agent only, **yes** = agent with local interface
 - SSEENABLE** = determines if you enable SSL 128bit encryption between the browser and the Local Interface, can be “**yes**” or “**no**”.
 - COMPUTERTYPE** = The type of platform you are installing on (**server, notebook, desktop**) if you choose desktop or notebook and the system is running a server operating system it will automatically install the software for a server
3. Languages currently supported:

Language	Abbreviation
English (US)	en
English (UK)	en_GB
French (European)	fr
French (Canadian)	fr_CA
German	de
Japanese	jp
Portuguese (European)	pt
Portuguese (South American)	pt_BR
Russian	ru
Spanish (European)	es
Spanish (South America)	es_MX

4. Examples:

Here is an example of the command line to install the software as **server agent** only with **no user interface** to the local system:

```
SyAM_Software_System_Client_v3.30.exe /VERYSILENT /SP- /SUPPRESSMSGBOXES  
/LANG=en /DIR="C:\syam" /AGENTONLY=yes /SSEENABLED=no /COMPUTERTYPE=server
```

Here is an example of the command line to install the software with the server agent and local interface (English) and SSL security:

```
SyAM_Software_System_Client_v3.30.exe /VERYSILENT /SP- /SUPPRESSMSGBOXES  
/LANG=en /DIR="C:\syam" /AGENTONLY=no /SSEENABLED=yes /COMPUTERTYPE=server
```

Here is an example of the command line to install the software with the desktop agent and local interface (French) and no SSL security:

```
SyAM_Software_System_Client_v3.30.exe /VERYSILENT /SP- /SUPPRESSMSGBOXES  
/LANG=fr /DIR="C:\syam" /AGENTONLY=no /SSEENABLED=no /COMPUTERTYPE=desktop
```

Here is an example of the command line to install the software with the notebook agent and local interface (Russian) and SSL security:

```
SyAM_Software_System_Client_v3.30.exe /VERYSILENT /SP- /SUPPRESSMSGBOXES  
/LANG=ru /DIR="C:\syam" /AGENTONLY=no /SSEENABLED=yes  
/COMPUTERTYPE=notebook
```
